SUMMARY

Results-driven Senior Java Developer and Project Leader with 9 years of experience in enterprise software development for Japanese offshore and local projects. Proven track record of leading development teams, delivering scalable enterprise applications, and modernizing legacy systems, including leveraging AI-assisted development tools to enhance productivity and code quality.

Skilled in Java, Spring Boot, Spring Batch, REST APIs, and microservices architecture, with extensive experience in financial and securities systems. Strong collaborator with cross-functional teams, committed to Agile delivery, engineering best practices, and delivering high-quality solutions that support business goals.

TECHNICAL SKILLS

- **Back-end:** Java, Spring Batch, Spring MVC, Spring Security, Data JPA, REST APIs, Hibernate, MyBatis
- **Front-end:** Thymeleaf, PrimeFaces, JSF, React, JavaScript, Bootstrap, HTML, CSS
- **Databases:** PostgreSQL, MySQL, Oracle
- **Development Tool:** Eclipse, VS Code, GitHub, SVN, Maven, Gradle, Postman,
- **AI Tool** : ChatGPT, GitHub Copilot
- **Testing:** JUnit, Mockito, Cypress (E2E)
- **Other:** Jasper Report, i-Reporter

EXPERIENCE

Senior Project Leader

July 2017 - Present

DIR-ACE Technology Ltd (Yangon, Myanmar)

My responsibilities in this IT based service company included, leading the development team and technical evolution of Japan offshore projects, guidance to team members.

- Led a team of software engineers delivering enterprise applications for Japanese clients.
- Collaborated with Japanese stakeholders during requirements analysis and technical discussions.
- Performed technical design, code reviews, mentoring, and project planning.
- Ensured code quality through best practices, testing, and Agile development.

Japan Offshore Projects Highlight

- Developed enterprise **financial and securities applications** using **Java, Spring Boot, Spring Batch, Angular, REST APIs**, and microservices for Japanese clients.
- Modernized legacy **C-based batch systems** by migrating them to **Spring Batch**, improving system maintainability, scalability, and reducing downtime.
- Designed and implemented financial services, APIs, and batch applications while participating in requirements analysis, system design, development, testing, and production support.
- Created technical design documentation and developed automation tools using **Java** and **VBA** to improve operational efficiency.

Local Projects Highlight

- Designed and developed the **JLPT Exam Registration and Form Submission System** using Java, Spring Boot, PostgreSQL, and Thymeleaf, streamlining applicant registration, document management, and examination administration processes.
- Developed a **Quotation Management System** using Spring MVC and PostgreSQL, enabling efficient quotation generation, approval workflows, and customer record management.
- Designed and implemented a **Share Management System** using Spring Boot, PostgreSQL, and Thymeleaf, improving shareholder data management, transaction tracking, and reporting accuracy while reducing manual processing errors.
- Developed a **Doctors and Patients Appointment Management System** using React.js and Node.js, providing real-time appointment scheduling, patient record management, and notification features as part of a thesis project

EDUCATION

European International University (Paris)

 Bachelor of Science in Information Technology

ETVA & Lincoln University College (Malaysia)

 Executive Diploma in IT Project Management

NCC Education (UK)

 Level 5 Diploma in Computing

MMR Institute (Myanmar)

 Advanced Diploma in Information Technology
