PROFESSIONAL SUMMARY

Senior Java Developer and Project Leader with 9 years of experience delivering enterprise applications for Japan offshore and local projects. Skilled in Java, Spring Boot, Spring Batch, Angular, REST APIs, and microservices architecture. Experienced in modernizing legacy C-based systems, developing securities and financial applications, and leading teams throughout the full software development lifecycle. Proven track record of delivering scalable, maintainable, and high-performance solutions using Agile methodologies.

EDUCATION

- 🎓 **BSc In Information Technology**
European International University (Paris)
 - 🎓 **Executive Diploma in IT Project Management**
ETVA & Lincoln University College (Malaysia)
 - 🎓 **Level-5 Diploma in Computing**
NCC Education (UK)
 - 🎓 **Advanced Diploma in Information Technology**
MMR Institute (Myanmar)
-

CERTIFICATIONS

- ✓ **Java EE Certification** (Java Developer Class)
 - ✓ **Java SE Certification** (Data World Training School)
-

TECHNICAL SKILLS

- ✓ **Languages:** Java, JavaScript, TypeScript, VBA,
 - ✓ **Frameworks:** Spring Boot, Spring Batch, Spring MVC, Spring Security, Data JPA, MyBatis, Angular, Thymeleaf, PrimeFaces, JSF , REST APIs
 - ✓ **Databases:** PostgreSQL, MySQL, Oracle, MS Access
 - ✓ **Tools:** Eclipse, VS Code, Git, SVN
 - ✓ **Testing:** JUnit, Mockito, Cypress (E2E)
 - ✓ **Other:** Jasper Reports, i-Reporter
-

PROFESSIONAL EXPERIENCE

DIR-ACE Technology Ltd - MICT Park, Hlaing Tsp, Yangon
Project Leader / Senior Java Developer (2017 – Present)

1) JAPAN OFFSHORE PROJECTS

- ◆ Developed microservices using Java and Spring Boot for Stock Exchange and Bond Information Management Systems, enabling efficient processing and distribution of securities market data.
- ◆ Created detailed system design documents (Detailed Design / Internal Design) for securities trading and bond information services, ensuring compliance with client requirements and development standards.
- ◆ Migrated legacy C-based batch processing systems to Spring Batch applications, reducing system downtime by 30% and significantly improving maintainability and scalability.
- ◆ Developed and enhanced RESTful APIs for financial data integration, supporting secure and high-volume transaction processing.
- ◆ Participated in requirement analysis, technical design, development, testing, and production support for Japan-based financial systems.
- ◆ Developed Data Analysis Tools using Java and VBA, automating reporting workflows and reducing manual processing effort.
- ◆ Developed MS Word to Excel Converter Tools using Java and VBA, improving operational efficiency and document processing accuracy.
- ◆ Led system maintenance and enhancement projects using Spring Boot and Angular, improving application performance, user experience, and system reliability

2) LOCAL PROJECTS

◆ Designed and developed the JLPT Exam Registration and Form Submission System using Java, Spring Boot, PostgreSQL, and Thymeleaf, streamlining applicant registration, document management, and examination administration processes.

◆ Developed a Quotation Management System using Spring MVC and PostgreSQL, enabling efficient quotation generation, approval workflows, and customer record management.

◆ Designed and implemented a Share Management System using Spring Boot, PostgreSQL, and Thymeleaf, improving shareholder data management, transaction tracking, and reporting accuracy while reducing manual processing errors.

◆ Developed a Doctors and Patients Appointment Management System using React.js and Node.js, providing real-time appointment scheduling, patient record management, and notification features as part of a thesis project.

Responsibilities:

◆ Manage a team of 8+ developers, with 80% hands-on development and 20% management.

◆ Ensure Agile sprint delivery with consistent **95% on-time completion**.

◆ Conduct code reviews, optimize backend logic, and maintain scalable architecture.
